

## 14.5 mm machine gun KPVT

14.5 mm KPVT tank machine-gun is a powerful automatic weapon mounted on the armoured vehicles, war boats, movable and stationary mounts with a large muzzle velocity (900 m/s). It is intended for fight against light-armoured targets, fire weapons and alive force located in light shelters at the distances of up to 2000 m, as well as air targets at the distances of up to 2000 m at the heights of up to 1500 m. Cartridges with armour-piercing-incendiary bullet B-32, armor-piercing-tracer bullet BZT and incendiary bullet of instant action MDZ are used for firing at surface and air targets. Feed of cartridges (right-hand or left-hand) is performed from the metallic connectable cartridge belt.

### SPECIFICATIONS

Machine gun cal. 14.5 mm

### DIMENSIONS

|                         |                           |
|-------------------------|---------------------------|
| Calliber (mm)           | 14.59                     |
| Weight (kg)             | 52                        |
| Barrel Length (mm)      | 1350                      |
| Overall Length (mm)     | 1980                      |
| Sights                  | mechanical                |
| Cartridge belts (round) | 10 belts of 50 cartridges |

### ACTION

|                                  |           |
|----------------------------------|-----------|
| Rate of fire (rounds per minute) | 550 – 650 |
| Effective range (m)              | 2000      |
| Maximum range (m)                | 7000      |
| Muzzle velocity (m/sec)          | 998       |
